Professional Summary

B.Tech Information Technology student graduating in 2027 with hands-on experience in Python, FastAPI, REST API development, and Generative AI applications using Google Gemini API. Experienced in building AI-powered and full-stack applications with database integration, authentication, and backend workflows. Interested in LLM-powered applications, AI agents, and workflow automation.

Projects

FinRelief AI – AI-Powered Debt Relief Platform | *Python, FastAPI, React.js, SQLite, Google Gemini API*

- Built an AI-powered financial recovery application using Python, FastAPI, React.js, SQLite, and Google Gemini API.
- Developed REST APIs and database-backed workflows for authentication, loan management, and personalized financial recommendations.
- Integrated Gemini API to support AI-generated settlement recommendations and financial negotiation letters.

Dream Destinations – Travel Booking Platform | *React.js, JavaScript, Vite, Tailwind CSS*

- Developed a React-based application with destination search, filtering, sorting, and dynamic package details.
- Implemented form validation, dynamic pricing, and multi-step booking workflows using reusable UI components.

SkillMate Pro – AI Career Planning Platform | *Python, Django, SQLite*

- Developed a career planning application with learning roadmaps, user authentication, and progress tracking.
- Implemented Django backend functionality and SQLite database operations to manage user information and learning progress.

Internship Experience

Google Cloud Generative AI Jun 2026 – Aug 2026
SmartBridge Educational Services Pvt. Ltd. — Remote APSCHE Collaboration

- Developed an AI-powered financial recovery application using Python, FastAPI, React.js, SQLite, and Google Gemini API.
- Worked on REST API development and database-backed workflows for financial data processing and AI-generated recommendations.
- Collaborated with team members using Git and GitHub for version control and project development.

Web Developer Intern May 2025
APSSDC — Remote

- Developed responsive web pages using HTML, CSS, and JavaScript with reusable UI components.

Technical Skills

Programming Languages: Python, Java, C
Backend Development: FastAPI, Django, REST APIs
Generative AI: Google Gemini API, LLM API Integration
Databases: SQL, SQLite, MySQL
Web Technologies: React.js, JavaScript, HTML, CSS
Core Concepts: OOP, DBMS, Data Structures & Algorithms
Tools: Git, GitHub, VS Code

Education

Bachelor of Technology – Information Technology 2023 – 2027
Aditya College of Engineering & Technology CGPA: **8.24/10**

Achievements

Solved 100+ programming problems across LeetCode, CodeChef, and GeeksforGeeks, focusing on Data Structures, Algorithms, and problem-solving.
